Malayoram coconut oil is rich in fatty acids and can have profound positive effects on health. The Lauric Acid in it can kill Bacteria, Viruses and Fungi, Helping to Stave off Infections. It can Improve Blood Cholesterol Levels and May Lower Your Risk of Heart Disease, It can Protect Hair against Damage, Moisturize Skin and Function as Sunscreen the fatty acids in coconut oil can boost brain functions in Alzheimer's Patients.

Malayoram Coconut oil Processing

Fresh coconut is converted to good quality copra through hot air drier, which retains freshness and colour. So the dried coconut (Copra) is free from smoke and Sulphur. Dried Coconut is broken into fine size particles to ensure full crushing. In the expeller, the oil from dried copra is extracted through cold process. This helps to retain the natural colour, aroma and freshness. The oil extracted in the expeller flows into the sedimentation tank to remove entrained foots from the oil. After sedimentation process the oil is transferred to filtration unit. The oil is first passed through a high pressure heavy duty filter press to further remove the solids in the oil. This is again filtered through a gravity filter to ensure even the finest particles are removed. The filtered oil flows into a surge tank from where it is finally pumped to the storage tank.

A Product from
KM Oil Industry

KM Oil Industry is established in 2005 and located at Meenpatty, Karuvanchal in Kannur District, Kerala. It is to be emphasized that our Company is located at a nature's gifted hill area where quality coconuts and other prime spices are grown. Hence the biological benefits of our Oil stands at its zenith comparing to rest of the locations where mass production takes place. Needless to mention that a real quality raw material can only turns into high class product to ensure all the merits of the Coconut oil. We specially care to procure local ripe coconuts maximum for our production line to maintain quality.

From the inception, under our dynamic and experienced management, the quality of our product is being monitored and innovated regularly to see that our releasing products are of with ensured qualities.

Regarding quality parameters, we have a well equipped lab undertaken by qualified staff to check every out coming products to confirm our proclaimed quality. Every point of our production is being checked by skilled technical staff and corrected then and there if required to meet quality thus ensuring that high class oil is produced to meet the enthusiastic and challenging market. The above strict and positive measures lead us to maintain our regular market and continuing enquires as well.
